Response to Amendment

Applicant's arguments with respect to claims 1-2, 5-8, 11-12 and 21-24 have been considered but are deemed to be moot in view of the new grounds of rejection.

Claims 3-4 and 9-10 have been cancelled and claims 21-24 have been added.

Claims 1-2, 5-8 and 11-24 are pending.

Claims 13-20 remain withdrawn from further consideration by the examiner, 37 C.F.R. § 1.142(b) as being drawn to a nonelected species. Election was made without traverse in Paper No. 3.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. § 1.56 to point out

Art Unit: 3407

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. § 102(f) or (g) prior art under 35 U.S.C. § 103.

Claims 1, 5, 7 and 11 are rejected under 35 U.S.C. § 103 as being unpatentable over Lebailly et al. in view of Kuzay. The patent of Lebailly et al., in Figures 1-3, in column 2, lines 35-48 and in column 4, lines 3-10, discloses a phase change liquid and an aluminum porous material (5) filled/located within an enclosed cavity formed by thermally conductive metal plates (1,2). The patent of Lebailly et al. fails to disclose the porous material being integral with the thermally conductive surface and being homogeneously disposed within the cavity.

The patent of Kuzay, in Figures 1-3 and 5 and in column 2, lines 40-58, discloses a porous material (12) bonded to a thermally conductive surface (11,24) and homogeneously disposed within cavity (10) for the purpose of constantly channelling heat from the conductive surface to a phase change fluid. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Lebailly et al. a porous material bonded to a thermally conductive surface and homogeneously disposed within a cavity for the purpose of constantly channelling heat from the conductive surface to a phase change fluid as disclosed in Kuzay. The remaining limitations are considered to be clearly met.

Claims 2, 6, 8, 12 and 21-24 are rejected under 35 U.S.C. § 103 as being unpatentable over Lebailly et al. in view of Kuzay

Serial Number: 08/406,226

Art Unit: 3407

as applied to claims 1, 5, 7 and 11 above, and further in view of Hermanns et al. The patent of Lebailly et al. as modified, discloses all the claimed features of the invention with the exception of a solid to liquid phase change material being a wax.

The patent of Hermanns et al., in Figures 1a-3b, in column 1, lines 27-29, in column 3, lines 25-29 and in column 4, lines 22-31, discloses a solid to liquid phase change material, such as a paraffin wax (1,1b), filled within an enclosed cavity for the purpose of uniformly transferring heat. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Lebailly et al. as modified, a solid to liquid phase change material, such as a paraffin wax, filled within an enclosed cavity for the purpose of uniformly transferring heat as disclosed in Hermanns et al.

Response to Arguments

Regarding applicant's arguments, the patent of Kuzay discloses a porous, highly conductive material (12) integral with (bonded to) and thermally coupled to a highly thermally conductive surface (11,24) for the purpose of constantly channelling heat from the conductive surface to a phase change fluid. The device of Lebailly et al. as modified by Kuzay is considered to meet the claimed invention.

Conclusion

Applicant's amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P.

Serial Number: 08/406,226

Art Unit: 3407

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Atkinson whose telephone number is (703) 308-2603 (FAX (703) 305-3463/3464).
